

# 1.4 Review Binary Trees

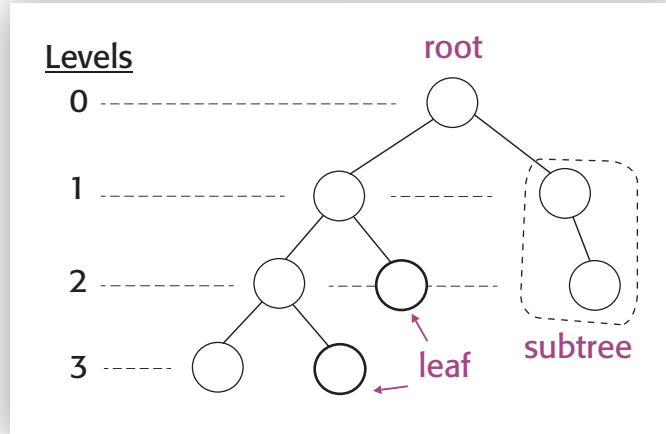

- ⇒ Node depth
- ⇒ Tree height

**Quiz**  
 Define a binary tree (*note recursive/self-repeating statement*).

**Quiz**  
 What's the **depth** in each case? What's the **maximum level** of a n-node binary tree?

$$H = \max\{H_L, H_R\} + 1$$

**Quiz**  
 What's the **height**? What about an empty tree? Why?

(c) Use formula

# Divide-and-Conquer Binary Tree Height

**Algorithm**  $Height(T)$

**Input** A binary tree  $T$

**Output** The height of  $T$

- 1: **if**  $T = \phi$  **then**
- 2:     **return**  $-1$
- 3: **else**
- 4:     **return**  $\max\{Height(T_L), Height(T_R)\} + 1$

**Algorithm**  $Height(T)$

**Input** A binary tree  $T$

**Output** The height of  $T$

- 1: **if**  $T = \phi$  **then**
- 2:     **return**  $-1$
- 3:  $H_L = Height(T_L)$
- 4:  $H_R = Height(T_R)$
- 5: **return**  $\max\{H_L, H_R\} + 1$

# Divide-Conquer Tree Height Analysis

Algorithm  $Height(T)$

Input A binary tree  $T$

Output The height of  $T$

1: if  $T = \phi$  then

2:     return  $-1$

3: else

4:     return  $\max\{Height(T_L), Height(T_R)\} + 1$

```
1: if  $T = \phi$  then  
2:     return  $-1$   
3: return  $\max\{Height(T_L), Height(T_R)\} + 1$ 
```

⇒ **Problem size, examples**

⇒ **Basic operation?**

⇒ **A recurrence (id worst case)**

# Divide-Conquer Tree Height Efficiency: Count Nodes

Observe,

 **Quiz**  
How many **external nodes** if a tree has  $n$  nodes? What's the total number of internal and external nodes?

1 addition/internal node

1 extra comparison/**external** node

# Binary Trees Conclusions

**Algorithm**  $Height(T)$   
**Input** A binary tree  $T$   
**Output** The height of  $T$   
1: if  $T = \phi$  then  
2:    **return**  $-1$   
3:  $H_L = Height(T_L)$   
4:  $H_R = Height(T_R)$   
5: **return**  $\max\{H_L, H_R\} + 1$

⇒ **Natural divide-conquer**

⇒ **Processing pattern**

Definition suggests family of recursive algorithms

 **Tree traversals**

 **Leaf counter**

 **Do exercises** (see practice code)   **Exercise 2**

**Exercise**  
Add code to monitor numbers of comps and additions, compare to formulas from textbook.
